

The GlobalLink AI Portal for machine translation provides a cost-effective document translation solution for short-turnaround projects. Compatible with 30+ different file formats, including scanned images and PDFs, the portal supports more than 40 languages. Employing Translations.com's Neural MT technology, it can be trained with glossary terms and previously translated text to customize outputs.

 **DATA SECURITY**

Private data centers, secure https access, no stored data if requested by the client

 **PROPRIETARY TECHNOLOGY**

Leverages neural machine translation technology developed by Translations.com

 **CUSTOMIZATION**

Leverage TM, glossaries, and other linguistic assets to provide more accurate translations

 **ARTIFICIAL INTELLIGENCE**

Supervised and unsupervised learning to increase quality over time

 **GLOBAL CUSTOMER SUPPORT**

24 hours a day, 7 days a week, 365 days a year
